

Maison Jacquard

The Core Collection 2026

Jacquard woven copper surfaces.

THE MATERIAL

Woven copper for architectural specification.

Maison Jacquard is a French design brand producing bespoke woven copper surfaces for architectural specification. Surfaces are applied as wall panels, glass partitions, architectural dividers, window treatments, furniture surfaces, and luxury packaging. Part of the LookGroup ecosystem. Designed in France.

The Core Collection is the foundation of the Maison Jacquard range. Eight Jacquard-woven series, each with a distinct structure: from micro-repeat geometrics to large-format ornamental patterns.

Each surface is 80 to 90% copper. Thread arrangement defines pattern and color. No printing, no surface treatment. The behavior under light is structural.

Applied as wall panels, laminated glass partitions, architectural dividers, window treatments, furniture surfaces and luxury packaging. Every variation available on request. Specifications adapted to project context.

COMPOSITION

80 to 90% copper, balance: metal alloy

THREAD DIAMETER

0.05 to 0.5 mm

WIDTH

150 cm standard, up to 280 cm

THICKNESS

0.7 mm (Core). Varies by design.

FIRE

A2-s1,d0 equivalent EN 13501-1

PRODUCTION

Made to order

SERIES 01

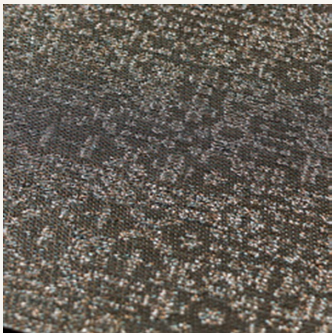

MJ - 2026
Floral Field

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	45 × 41 cm	150 cm

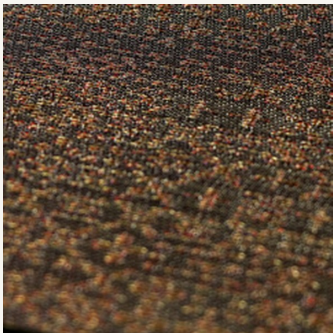

A dense floral ground at 45 cm repeat. The pattern dissolves into organic texture at distance. Close inspection reveals the botanical motif. Seven variations from warm copper to deep charcoal.

Linear Shift

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	24 × 20 cm	150 cm

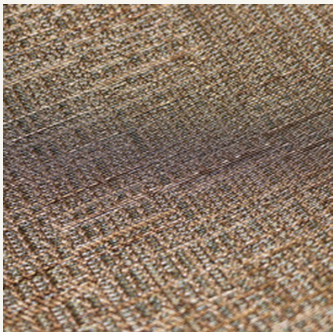

A linear weave structure at 24 cm repeat. Catches directional light differently at each angle. The most architectural of the collection. Clean for contemporary interiors, robust for hospitality.

MJ - 2028
Fine Weave

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	10 × 14 cm	150 cm

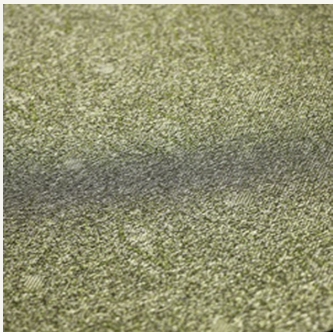

The finest repeat in the collection at 10 × 14 cm. At distance the surface presents as a solid color field. Proximity reveals a complex woven structure. Seven variations from silver-grey to deep teal.

Ornamental

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	30 × 30 cm	150 cm

A 30 cm square repeat with interlaced botanical forms. Reads as texture at distance, as composition up close. The strongest series for hospitality and high-end residential contexts.

MJ - 2030
Micro Relief

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	2 × 1.1 cm	150 cm

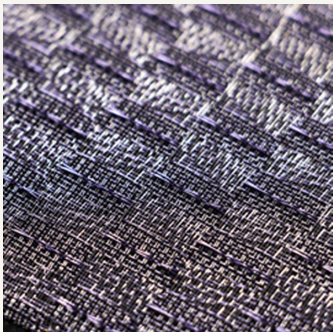

The smallest repeat in the collection: 2 × 1.1 cm. Structural relief visible only at close contact. At specification distance the surface presents as a refined monochrome field. Five variations.

SERIES 06

MJ - 2031
Gradient

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	47 × 30 cm	150 cm

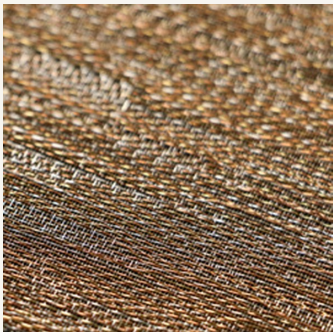

A tonal gradient woven directly into the structure. No printing, no applied treatment. Color shift is produced by thread arrangement. Six variations, each transitioning across a distinct tonal range.

SERIES 07

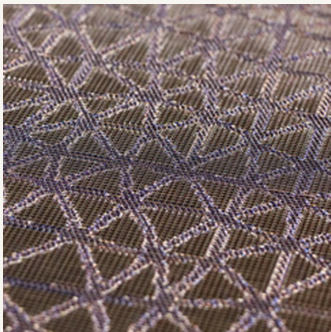

MJ - 2032
Star Lattice

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	150 × 180 cm	150 cm

An intersecting star lattice at 150 × 180 cm repeat. Reads as linear geometry at distance, reveals its complexity under direct light. Six variations from cool silver to iridescent teal.

Geometric

CONTENTS	REPEAT	WIDTH
80 to 90% Copper, balance other metals	150 × 160 cm	150 cm

The largest repeat in the collection at 150 × 160 cm. A scaled diamond lattice that demands space to complete. Designed for floor-to-ceiling wall panels. The full pattern reads across a single panel width.
