

WE ENGINEER THE ALTERNATIVE

Architectural surfaces and services,
engineered and made in the French Alps and
produced worldwide.

— 02 • THE STUDIO

One studio holds the project end to end.

Studio Saint-Pierre works from Saint-Pierre-en-Faucigny, a short drive from Geneva. Design and engineering stay with the studio. Production runs through the group's manufacturing network.

— 03 · THE RANGE

A material translation studio.

01 Bespoke finishes
Liquid metal, decorative paint, special lacquers

02 Printed surfaces
Your design or your idea, no minimum, printed on wallpaper, textile, rigid substrates

03 Bespoke metal weaving
Woven copper surfaces for architectural specification

04 Interior design services
Visualisation, spatial capture, surface pattern design

05 Art reproduction
Paintings, wallcoverings, stretched ceilings, framed panels

Every route runs through Specificio,
the studio's project layer.

— 04 • BESPOKE FINISHES

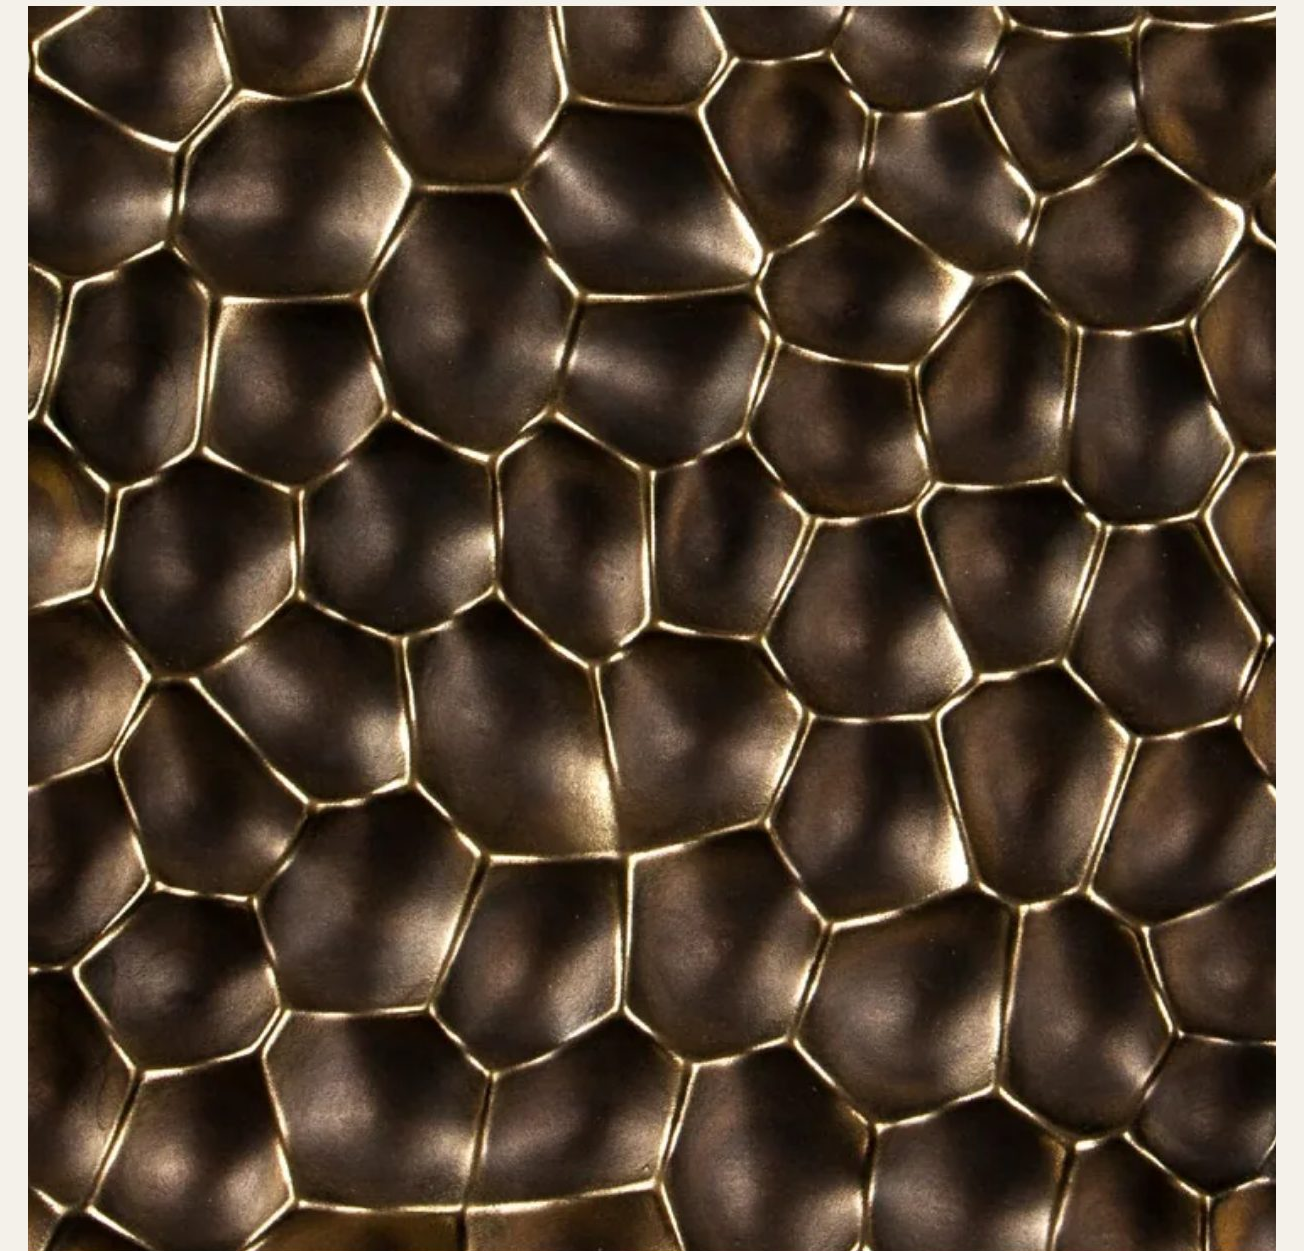

Real metal, applied as a skin.

Bronze, brass, copper, tin, iron, zinc and aluminium, applied by hand over a wide substrate range. Decorative paint and special lacquers sit in the same family.

IN PLACE

Liquid Metal on staircase, elevator and furniture

MACRO

Surface at close range, raking light

— 05 • PRINTED SURFACES

Designed and printed for your project.

IN PLACE

Digitally embossed wallcoverings with tactile relief up to 2mm

ORNAM

Relief collection, close crop

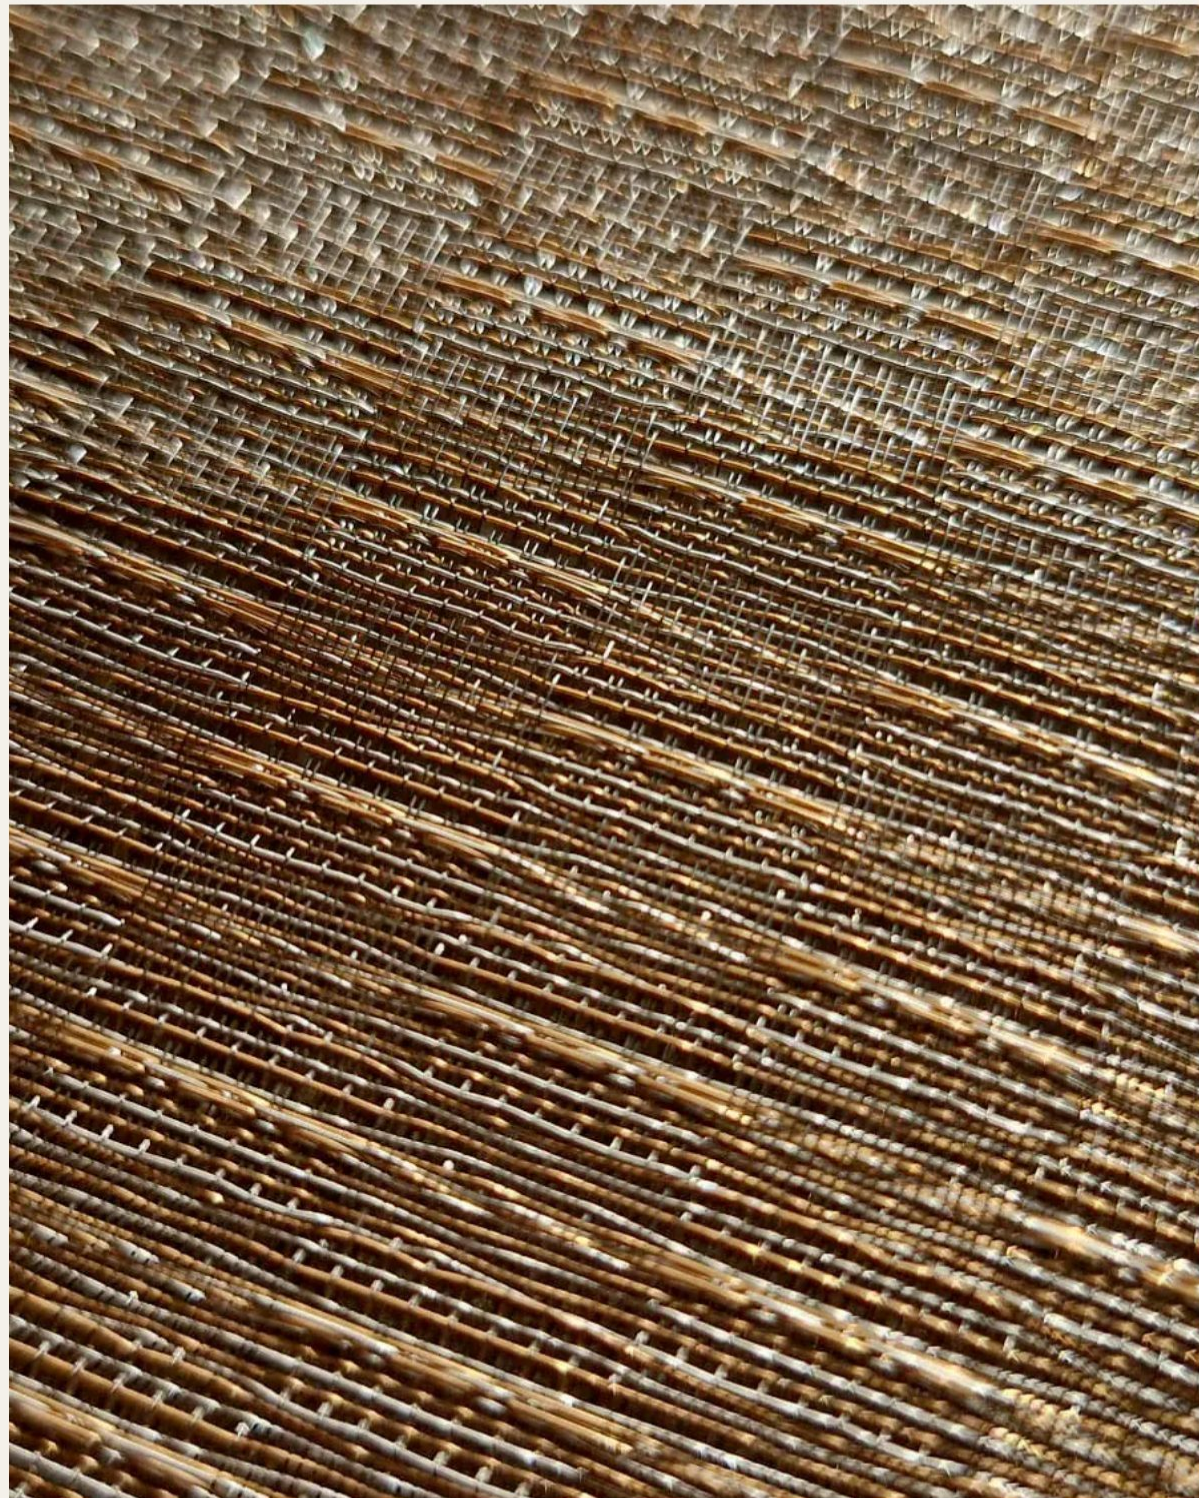

3D wallpaper, wallpaper, interior textile, rigid panels for art and decor.

We print on a substrate adapted to the destination. Up to 5000mm.

— 06 · BESPOKE METAL WEAVING

Woven copper surfaces for architectural specification

Surfaces are applied as wall panels, laminated glass partitions, architectural dividers, window treatments, furniture surfaces, and luxury packaging.

MACRO
Copper thread, 0.05 to 0.5mm

IN PLACE
Woven metal partition

Material house: Maison Jacquard.
maisonjacquard.com

— 07 · INTERIOR DESIGN SERVICES

From a first schematic to a finished animated or still rendering

IN PLACE

Interior design support and 3D rendering

01 3D visualisation and rendering

02 3D scanning and spatial capture

03 Surface pattern design

DETAIL

Pattern study, spatial capture output

From a scan, or an open file, to an architectural surface.

We reproduce a work from a scan of a painting or from a public open file, then engineer it as a surface at architectural scale.

IN PLACE
Reproduced work as a mural wall

APPLICATIONS

- 01 Murals and wallcoverings
- 02 Stretched ceilings
- 03 SEG systems
- 04 Carpentry-framed panels
- 05 Yacht and secondary-residence packages
- 06 Hospitality and private-club programs

MACRO
Brushwork held at reproduction scale

— 09 · SURFACES IN PLACE

Delivered work.

RESIDENTIAL, FRENCH ALPS

Liquid Metal on staircases, elevator, furniture, signs

HOSPITALITY, CONFIDENTIAL

Surface printing and Liquid Metal on walls, furniture

RESIDENTIAL, SWITZERLAND

Decorative paint, interior design support, 3D rendering

— 10 · SPECIFIO

The project layer.

Every brief runs through Specifio. Your account holds files, revisions and quotes in one place, from first reference image to delivery.

01 Sample library, browsable by house

02 Brief intake, written or from a reference image

03 Project room: files, revisions, quotes

Costed envelope within 48 hours.

— 11 · DISTRIBUTED MANUFACTURING

Produced close to the project, wherever the project is.

Every surface is designed and engineered in Saint-Pierre-en-Faucigny. Production runs through LookGroup facilities in France, the United States, Canada, Qatar and the Philippines.

DISTRIBUTED MANUFACTURING ADVANTAGES

- 01 Less logistics
- 02 Lower tariff exposure
- 03 Shorter lead times
- 04 Reduced carbon footprint
